### International Symposium Committee

#### Chairs

*Dragan Poljak, Vesna Roje  
University of Split, Croatia*

*Juraj Bartolic,  
University of Zagreb, Croatia*  
*Jens Hauelsen,  
Institute of Biomedical  
Engineering and Informatics,  
Ilmenau, Germany*  
*Flavio Canavero,  
Politecnico di Torino, Italy*  
*Christos Christopoulos  
University of Nottingham, UK*  
*Elya Joffe,  
KTM. Project Engineering, Izrael*  
*Khalil El Khamlichi Drissi,  
Polytech Clermont-Ferrand,  
France*  
*David Larrabee,  
University of Pennsylvania, USA*  
*A. Giannopoulos,  
University of Edinburgh, UK*  
*A. Hirata,  
Nagoya Institute of  
Technology, Japan*  
*Frank Leferink,  
University of Twente,  
Netherlands*  
*Andy Marvin  
University of York, UK*  
*Borivoj Modlic  
University of Zagreb, Croatia*  
*Andres Peratta,  
Wessex Institute of  
Technology, UK*  
*Farhad Rachidi,  
Swiss Federal Institute of  
Technology, Switzerland*  
*Antonio Sarolic,  
University of Split, Croatia*  
*Sergey Tkatchenko,  
Otto-von-Guer University of  
Magdeburg, Germany*  
*Miroslav Joler,  
University of Rijeka, Croatia*

## Symposium on: ENVIRONMENTAL ELECTROMAGNETIC COMPATIBILITY (EEMC)

**Symposium Co-chairs:** Dragan Poljak, Vesna Roje  
*University of Split, Croatia (dpoljak@fesb.hr, vroje@fesb.hr)*

### Call for Papers

Symposium on "Environmental Electromagnetic Compatibility" in the frame of the 28<sup>th</sup> International Conference on Software, Telecommunications and Computer Networks (*SoftCOM 2020*), technically co-sponsored by the IEEE Communications Society (ComSoc), will be held in hotel Amfora in Hvar on September 17-19, 2020.

The rapid growth of the telecommunication industry has resulted in an increasing number of various transmitting installations, (particularly GSM and UMTS), and the related influence on human health has recently become a very hot and controversial issue.

While the message or data-handling processes and computational capabilities are necessary aspects of the mobile and wireless communication systems, the intensity and form of transmitted electromagnetic energy is of the great interest to biological researchers.

The aims of the Symposium are not only related to the modeling of natural electromagnetic interference (EMI) sources, such as lightning, and analysis and design of the protection systems (LPS), but also to the optimization of the radiation sources design and investigating EMC aspects of new technologies such as IoT antenna design, or 5G devices dosimetry.

Accepted and presented papers will be published in the conference proceedings, and submitted to IEEE Xplore as well as other Abstracting and Indexing (A&I) databases. Authors of selected papers will be invited to submit an extended version of their manuscripts for publication in a special issue of the Journal of Communications Software and Systems (JCOMSS).

We cordially invite speakers to present their original contributions in the area of EMC. The topics of interest include, but are not limited to:

- *Advanced Numerical Modeling*
- *Deterministic-stochastic Approaches*
- *Magnetohydrodynamics*
- *Sources of Electromagnetic Interference*
- *Antennas for Mobile Communications*
- *IoT (Internet of Things) Antenna Design*
- *Ground Penetrating Radar*
- *Lightning*
- *Grounding*
- *Electromagnetic Field and Thermal Dosimetry*
- *Biological Effects of Electromagnetic Fields*
- *Electromagnetic Stimulation of Human Tissue*

#### IMPORTANT DATES

Complete manuscript due	June 22, 2020
Notification of acceptance	July 1, 2020
Camera-ready manuscript	July 20, 2020
